

Welcome to another new school year. If you are feeling a great deal of pressure right about now, that means, you are involved in your district's transportation department. For a lot of us, growth in North Texas is far from over and the result is more students, which equals more equipment, which equates to more drivers. All of this combined equals more pressure. We have a solution this year for easing the pain. Why not take the opportunity and put yourself in a room with lots of smart people, just like you, an opportunity to network not to mention food and entertainment. I am referring to the North Texas Association of Pupil Transportation second Thursday luncheon meetings. You will find the meeting times on this site.

We expect an increase in membership this year as we see an interest in all the great things NTAPT is doing with the meetings, the school bus Road-e-o, and friendly people. We try to make every meeting fun and informative with interesting guest speakers and of course, great food, provided by our partnering vendors.

I'm excited to get started and hope to see you every month and hear the fun stories offered. Please invite at least one new member as a challenge from me to you for the up and coming 2018-2019 "the year of the driver."
